# ABOUT BAT RESCUE INC.

Formed in June 2002, Bat Rescue Inc. is an incorporated, non-profit volunteer organization based on the Sunshine Coast. The membership also includes supporters from other areas of South-East Queensland, interstate and overseas.

Active (carer) members are permitted under DERM (Department of Environment & Resource Management) to care for sick, injured and orphaned wildlife. Bat rehabilitation is a unique branch of wildlife caring as vaccination against Australian Bat Lyssavirus (ABL) is required. Volunteers respond to large numbers of rescue emergencies involving bats which minimizes the risk of exposure to ABL within the community.

Members of Bat Rescue Inc. work closely with vaccinated veterinarians who have an interest in bats and provide invaluable support for our work.

*Bat Rescue Inc. is dedicated to:*

- *Providing education and information to the general public*
- *Active conservation of bats and their habitat*
- *The promotion of bats as an important part of our ecology*
- *The rehabilitation and release of bats back to the wild*

## Management Committee 2012/13

### ELECTED OFFICE-BEARERS

|           |                 |
|-----------|-----------------|
| President | Sylvia Hood     |
| Secretary | Danielle Dedman |
| Treasurer | Carmel Givens   |

### OTHER POSITIONS

|                        |                    |
|------------------------|--------------------|
| Membership Secretary   | Sammy Ringer       |
| Minute Secretary       | Danielle Dedman    |
| Sponsorship Secretary  | Carmel Givens      |
| Website Administration | Sammy Ringer       |
| Grants Officer         | Jennifer Singfield |

## President's Report

Bat Rescue Inc has had a very busy year with a huge influx of orphans and rehabs. Every year when I compile the statistics, it amazes me how different our workload can be from year to year. We also managed to conduct two sausage sizzles to top up our funds which helps us fund the creche and release program and support our busy carers.

Again we called upon Jan Davey in Noosa, for banding and release of our handraised orphans and Sammy Ringer for our bat creche. So a big thank you to Jan and Sammy for taking the orphans into their capable hands for the final phase of preparation for their survival in the wild.

This year has seen the devastating result of the change in State Government leadership. Legislation has been overturned by the previous Labour Government and now shooting flying-foxes has been legalised for orchardists through the damage mitigation permit process. Dispersals of colonies can be done with no permit at all. Test cases around the state have shown that the EPBC act gives little protection for threatened species such as the Grey-headed flying-fox as dispersals requiring referral to the EPBC act for a permit have in all cases, been granted. Flying-foxes are clearly at risk under Premier Campbell Newman who continues to modify legislation and weaken laws that directly impact their survival. The new facebook page "Campbell Newman's Bat Shame" and "Dont Shoot Bats" has support both nationally and internationally and continues to gain more support as the war on bats unfolds. I do wonder why he has such a hatred for this native animal, and how far he is willing to push his agenda, their survival really does hang in the balance.

Our Bat Rescue Inc facebook group now has 74 members, and continues to gain interest. Thanks to Megan Vella for looking after this group and accepting members, monitoring content etc. The Bat Rescue Inc website receives many queries and thanks to Sammy Ringer who attends to many of these and keeps the website current.

This year the Frosty Fruit Bat cool room was hired out again and continues to earn its keep to cover insurance and registration costs. Thanks to Carmel and Ridley this major piece of equipment is cared for and maintained to a standard that makes it a viable rental income for Bat Rescue. Our sponsorship program continues to draw interest and we see some regulars returning to support another orphan or adult. Thanks to Carmel who manages this program and gives each sponsor the personal attention when they choose to sponsor an orphan following it right through to release.

Thanks to Lyn Boston our displays and catering continues to surpass all expectations, and anyone who has attended a workshop or AGM will know Lyn's attention to detail is second to none! Thanks to Danielle who will be teat-making again this year in time for orphan season, so we will have them in stock for carers.

I would like to thank all the dedicated volunteers, our supporters, sponsors and donors who have helped us continue to do our work throughout the year.

Sylvia Hood  
PRESIDENT

## Treasurer's Report

This year Bat Rescue managed to conduct two sausage sizzles that raised a gross income of \$1475.35. The net profit was \$941.47. We are very grateful to all those members that assisted us in making those fundraisers a success.

Our chocolate sales continue to do well thanks to our Chocolate fundraising star Megan Vella, raising a gross income of \$1141.00 for the year. The net profit was \$661.05.

Our sponsorships were up again on the previous year totalling \$1003.26. This is clear profit less some printing and postage. The donations this year totalled \$1731.40 which is a significant increase over last year, thanks to the cool room being loaned out to organisations who donate funds in return. Membership fees brought in a total of \$505 which was an increase from last year of \$105. There was no income from workshops this year as only one was held, however we plan more for next year. Merchandise sales from events totalled \$281.20, however as these are mostly educational events we don't expect this to be a major revenue stream.

The cost of bat food and high protein supplement was over \$1000 more than last year due to the increase in rehabs and orphans coming into care. High Protein Supplement continues to be provided for free to all those active members who choose to operate under the Bat Rescue Inc permit.

As at June 30, 2013 our financial position is \$3736.45 in cash and stock (around \$500 increase over last year) and a further \$32858.47 in plant and equipment. As a non-profit organization, we have enough funds to cover our minimal running costs and with ongoing fundraising efforts we can continue to provide a service that supports the welfare and conservation of bats.

Carmel Givens  
TREASURER

## Financial Report 2012-13

# ACHIEVEMENTS 2012/2013

## Membership

As at the end of the financial year there were a total of 60 members including active carers, support members and complimentary members(sponsors and donors). Our support membership also continues to grow through our Bat Rescue Inc Facebook group with 74 members. Phoebe has her very own Facebook page too, and is updated when she attends events or has something informative to share.

## Grants

There have been no grants received this financial year.

## Newsletters

Unfortunately there has been no new editions of *Night Wings*, Bat Rescue's newsletter this year. Sammy Ringer has kindly distributed a few e-bulletins this year to keep members and supporters in the loop. We hope to get a bulletin out after the AGM to let members know what is happening, and hope to resume production of *Night Wings* in the new financial year.

## Website

The Bat Rescue website is now maintained by Sammy Ringer. Hosting continues to be sponsored by Brett Warner.

## Publicity & Campaigns

### *The Grey Cross Event*

The Grey Cross campaign was supported by dozens of wildlife and animal welfare organisations in Australia and internationally. On 3-4 November, 2012 inverted grey crosses mysteriously appeared in multiple locations across eastern Australia culminating in a rally outside Parliament House in Brisbane.

The inverted crosses symbolise the plight of thousands of flying-foxes subject to government-sanctioned shooting in Queensland and NSW.

Both governments issue permits to kill flying-foxes despite the acknowledged cruelty of shooting, the availability of non-lethal methods of crop protection and the vulnerability of flying-foxes to decline, with two species threatened.

The Queensland Government will allow more than 10,000 to be shot over the next year and the NSW Government issues licences for several hundred to a thousand. NSW intends to phase most shooting out by 2014.

The symbolism of the inverted grey cross:

- crosses commemorate the dead
- Inverted crosses recognise that flying-foxes hang upside-down
- Grey refers to Grey-headed flying-foxes, one of the two threatened species subject to shooting

This campaign coincided with our new carer training, so was a perfect opportunity to join the campaign and support the cause. The hall and grounds were decorated with grey crosses of all sizes, and the Sunshine Coast Daily picked up our story and published an article. We also receive continued support from publications such as the Hinterland Times and the Nambour Weekly.

## *Cover Story in the Hinterland Times*

In March this year, our Maleny carers took advantage of creche time and managed to obtain a cover story on flying-foxes (see cover on our cover). The photo opportunities were perfect with the creche cage full of juveniles. Creche time is always very busy with feeding, weighing, measuring etc etc so it was fantastic that our dedicated team were able to spare some time to a much needed good news story. See the 2 page spread below and some photos from creche 2013 - chopping, feeding, measuring.

## The **Flying Fox** needs Friends ...

**HAWKS TO SAY**, when you get up close to a bunch of hanging hawks it's very hard not to be impressed by their coloration and alert eyes. Carmen Gervais is a fan of the crowsans of *Alouattas*. She and Sammey Finger took me inside a large nested cage in which up to 30 monkeys were hanging and whispering to each other. Apart from declaring their flying bows "queerly" she had a more profound message to pass on:

"Now allowed the calling of flying hawks we would really lose out hardwood forests."

Carsten said that flying hawks eat the fruit, regular or otherwise, of many different trees and these plants rely on the bats for seed dispersal and pollination. In fact, flying hawks are the predominant pollinator of Southern Ecuadorian cloud forest trees.

(eg, rays, noise, smoke). Vehicles are currently available. The live bats is not helped by the continuing media campaign making people think that all flying foxes in particular are *vermin* carriers.

The recent report that a young boy in North Queensland had contracted Lymphocytic from a flying fox gave Federal MP Bob Katter the opportunity to once again urge the Queensland government to allow the cutting of flying fox colonies.

"In 2011 we have dogs less positive. In 2012 we had horns less positive. We have continually pushed the Government for bat calling and it still hasn't happened. This is about as bad as it can get."

This is the first case of *vermin* in Australian history and while this does not relate us the threat in racing

## Displays

Top Left/right: World Environment Day-USC 9thJune 2013 - Zoe educating the next generation with Phoebe enjoying the attention.

Bottom left Woodford Tree Planting Event 4th May 2013

Bottom right PEW Talk

## Fundraising

Two successful sizzles were held in this financial year at Officeworks, Maroochydore. It is always a great way to raise needed funds in a painless one day event such as a sizzle. We have found these very manageable and also a bit of fun too. No one can resist the smell of a BBQ after a spot of shopping!

## Sponsorship & Donations

Our sincere appreciation to the following sponsors and donors, including commercial sponsors and regular private contributors:

*Joanne Adams  
Lyn Boston  
Morag Bruce  
Sautec  
Barry Trail  
Pamela Bates  
Kylie-Ann Horton  
Maple Street Co-op*

Janelle Charmer  
Georgie Bull*

Annual Report 2012/2013

## Training

4th November 2012     *Baby Bat Boot Camp*

## Active Conservation of Bats & Their Habitat

This year there have been a number of dispersals around South-East QLD and some of our members have attended them to observe, document and film if possible. Sammy Ringer attended the Pittsworth dispersal, and with the threat of dispersals in our own back yard here on the Sunshine Coast there may be more local issues in the new year.

The LNP State Government not only legalised the shooting of flying-foxes in their first year of government, they also removed the application process for a damage mitigation permit to disperse flying-fox colonies. When few local councils took up the option to disperse Premier Campbell Newman was threatening to bring in the "bat squad" and do it on their behalf if they didn't act to disperse colonies.

On the 20th June 2013 the Sunshine Coast Council applied to the Department of Environment, Water, Heritage and the Arts for permission to carry out a dispersal in the Cassia Wildlife Corridor in Coolum. This is due to the fact that Grey-headed flying-foxes are threatened and the subject of a draft recovery plan under the EPBC Act. Bat Rescue Inc along with other organisations wrote a submission to this referral outlining the reasons why a permit should not be issued. Unfortunately the permit was issued, however due to a number of pregnant females observed in the camp, the dispersal was cancelled at the last minute. One other camp is destined to be put under the same pressure in Maroochydore at the Stella Maris Catholic School. Environment Levy funds will be used for the dispersal which has angered residents, as it is not how the funds were intended to be used. Only a small number of residents have complained and lobbied their Council representatives, but the squeaky wheel won in the end.

# Rescue Report 2012-2013

## Orphans Released

**Table 1 – Summary of orphans raised**

| Species      | Female    | Male      | Total     |
|--------------|-----------|-----------|-----------|
| Grey-headed  | 5         | 6         | 11        |
| Black        | 10        | 13        | 23        |
| <b>Total</b> | <b>15</b> | <b>19</b> | <b>34</b> |

**Table 2 – Summary of orphans by the reason for entering care**

| Reason in Care       | Black     | Grey-headed | Total     |
|----------------------|-----------|-------------|-----------|
| Barbed Wire orphan   | 1         | 4           | 5         |
| Found Abandoned      | 8         | 1           | 9         |
| Electrocution orphan | 2         | 1           | 3         |
